NUOVI COLORI

SIGILLANTI MATERIA

La materia incontra la superficie e si fonde con essa: nascono così i nuovi sigillanti ADESITAL che interpretano le sfumature della terra, del legno, del cemento e del mondo dei colori.

FUGAMAGICA® ZEROSEI MATERIA

Sigillante decorativo idrorepellente a base cementizia per la fugatura tra 0 e 6 mm di piastrelle ceramiche.

- 40 colori nelle 4 collezioni: WOOD, COLORE, CEMENTO, TERRA.
- Classificati C62WA secondo la Norma EN13888: il massimo delle caratteristiche meccaniche e prestazionali.
- Classificati EC1 Plus. A bassissima emissione di VOC (Composti Organici Volatili) per la tutela della salute all'interno degli ambienti.
- Idrorepellenti. Contrastano il passaggio dell'acqua, mantengono i sottofondi asciutti.
- Contrastano l'affioramento di efflorescenze, diminuiscono il rischio di antiestetici affioramenti.

- Resistenti ai raggi UV. I colori non sbiadiscono e non cambiano per esposizione alla luce.
- Resistenti ad alcali e detergenti mantenendo inalterato il loro aspetto nel tempo.
- Resistenti alla formazione di muffe. In ambienti umidi contrastano la formazione e lo sviluppo di muffe.

Confezioni: sacco da 25 kg - scatola da 4x5 kg - scatola 4x2 kg

ADEPOXY MATERIA

Stucco epossidico bicomponente pregiato per la fugatura di materiali ceramici e vetrosi.

- Finitura liscia.
- Classificati R6 secondo la Norma EN 13888.
- Classificati R2 secondo la Norma EN 12004.
- Classificati EC1 Plus. A bassissima emissione di VOC (Composti Organici Volatili) per la tutela della salute all'interno degli ambienti.
- Facile da pulire. Il prodotto si pulisce immediatamente dopo la posa solo con acqua.

- Colori inalterabili nel tempo. Le tonalità cromatiche non sbiadiscono e non cambiano per esposizione alla luce.
- Elevata resistenza agli acidi e ai composti chimici. Il prodotto possiede elevate caratteristiche igieniche.

Confezioni: fusto da 3 kg - comp. A 2,7 kg / comp. B 0,3 kg

ADESIL MATERIA

Sigillante silconico a reticolazione acetica ed esente da solventi.
